Where It Pays To Trade

Main Substitute is Gift.

MINNEAPOLIS, March 1.—A machine which will pulverize the surface of the earth, according to the inventor, make dry farming easier and rainfall unnecessary to assure good crops, was given to the state of Minnesota in the will of Martin Gullickson, who committed suicide January 10. A patent already has been obtained.

Gullickson, an inventor, lived with John O. Peterson, 219 Twenty-second avenue South. For years he had been

working on the theory that were the planting surface of the earth pulverized the moisture of air would be sufficient for the crops.

Mrs. Ingaborg Gullickson, his mother, retained W. E. Rowe, of Crookston, who appeared before Probate Judge John A. Dahl today to ask that the will be set aside. The attorney declared that Gullickson was of unsound mind at the time the will was made. The hearing was set for April 27.

Peterson was left \$5000 and the balance of the estate, including the machine, was left to the state.

once of the estate, including the machine, was left to the state.

Mrs. Depew's Sister Wed.

LONDON, March 1.—Another American woman entered European nobility recently when Mrs. Alice Andrew, a sister of Mrs. Chauncey M. Depew, and Baron Wedel Jarlsberg, Norwegian minister to Paris, were quietly married. Only close personal friends of the couple were present. The witnesses signing the register were W. H. Page, the United States Ambassador; Sir Ernest Cassel, the famous English banker; Henry Groenkov-Sustenskjold, the Danish minister; and Benjamin Vogt, the Norwegian minister.

The bride is a daughter of the late Henry Palmer of New York, and the bridegroom, who is 50 years old, is a member of a Norwegian family which is extremely wealthy and dates back to the 12th century.

REASSURING MOTHER.

Edmund had just begun to attend the public school, and had found a new friend, a child of whom Edmund's mother had never heard. "Who is this Walter?" she asked. "Is he a nice little boy?" "Yes, ma'am, he is!" replied Edmund, enthusiastically. "Does he say any naughty words?" "No," replied Edmund, with emphasis, "and I'm not going to teach him any!"—Youths Companion.

Look! Resinol has cleared that awful skin-eruption away

The moment that Resinol Ointment touches itching skin the itching usually stops and healing begins. That is why doctors have prescribed it so successfully for over 20 years in even the severest cases of eczema, ringworm, rashes, and many other troublesome skin diseases. Aided by warm baths with Resinol Soap, Resinol Ointment makes a sick skin or scalp healthy, quickly, easily and at little cost.

Resinol Ointment and Resinol Soap also make baby skin clear, keep babies and family clean. Sold by all druggists. Men with itchy faces welcome Resinol Shaving Stick.

SOCIAL AND PERSONAL

A delightful afternoon at bridge was spent yesterday afternoon by more than fifty ladies at the home of Mrs. David H. Nelson, 111 East Washington street. Mrs. Nelson and Mrs. William H. McCormack being hostesses. The rooms were very attractive in the offerings of early spring, potted hyacinths and ferns forming the principal part of the decorations.

Fourteen tables played at bridge during the afternoon, honors being won by Mrs. Carl Power and Mrs. A. E. Tammie. After the play dainty refreshments were served and about fifteen additional guests called for a social hour. Assisting in the serving of refreshments were the Misses Margaret Phelps, Madeline Burgess, Irene Rhea, Georgianna Fletcher, Blanche Furnish and Helen Nelson.

Mrs. Nelson and Mrs. McCormack are entertaining this afternoon also at a thimble party.

This afternoon at the home of Mrs. John F. Robinson the members of the three ladies organizations of the Church of the Redeemer are being entertained, the hostesses being Mrs. Charles Greulich, Mrs. Frank Frazier, Mrs. Ralph Folsom and Mrs. George Fell.

Mrs. P. H. Van Orsdal and Mrs. W. P. Daniel were charming hostesses yesterday afternoon to the ladies of the Maccabee Social Club at the home of Mrs. Van Orsdal. After the business session the ladies enjoyed a social hour with fancy work and guessing contests. A dainty three course

luncheon was served. Guests besides the members included Mrs. Cote, Mrs. Brown, Mrs. Gibson and Mrs. Huff. The next meeting will be held on March fourteen at the home of Mrs. Robert P. Kirkpatrick on Locust Hill.

Mrs. Frank Connors and child of La Grande are visiting with friends in the city.

To meet Mrs. James Alger Fee, a recent bride, many ladies are this afternoon calling at the home of Mrs. James Albert Fee.

The ladies of Alpha Assembly, United Artisans proved charming hostesses last evening at their leap year party in the Moose Hall and the men, who were the guests, are loud in their praises of the ladies. There were about 175 present for the occasion and all had a very pleasant time. A buffet supper was served and followed by dancing until midnight.

E. J. Wilbur, prominent sawmill man of upper McKay creek, is in the city today.

W. S. Ferguson drove down from Athena yesterday to attend the good roads meeting.

Herbert Boylen, prominent sheepman of Pilot Rock, was in yesterday and attended the good roads meeting.

Carl McNaught of Hermiston and C. G. Brownell of Umatilla were two of the delegates to the good roads meeting yesterday from the west end of the county.

The Corner-Stone of Prosperity

Advocates of military "preparedness" are pointing to the federal reserve banking system as an example of the success of preparedness as applied to business and finance. It is contended that the present prosperity of the United States dates from the mobilization of the nation's credit and banking power by the installation of the new banking system. It went into effect soon after the war in Europe began and, according to general belief, enabled the United States to meet the business crisis caused by the war.

Under this new system, your savings, mine and those of the other fellow and of all other American citizens are united and put to the use of all of us in the common for financial "defense." William P. Malburn, first assistant secretary of the treasury, describes the personal service rendered by the reserve system thus:

"Your bank need never close its doors while it has its portfolio filled with good loans, because of insufficient money in the vaults to pay depositors who are demanding their money. If a solvent merchant or manufacturer, you will not be obliged to close your place of business and perhaps be stamped as a bankrupt because your bank for some peculiar and temporary reason lacks the cash to give you a loan on your good assets. If you have a job in a factory, you are no longer exposed to the danger of loss of employment by the closing of that factory, if it is in solvent condition, because your employer's bank is unable to provide cash for the pay rolls."

"In all these situations and a multitude of others, now, the member banks of the federal reserve system when money is needed, take the good notes of farmers, merchants and manufacturers to the federal reserve bank and convert them into federal reserve notes which are obligations of the United States government."

"These notes are probably safer than any paper money ever devised. When the reserve banks issue these notes they are required to hold in their vaults gold to an amount equal to 40 per cent of the face of the note so that they may be able to redeem them if they are presented for payment. The notes have the government and 40 per cent gold behind them. National bank notes, which have never fallen below par in the fifty years of their existence, have only five per cent in gold or lawful money behind them."

"This means an end of panics. With member banks of the federal reserve system able to pay out over their counters these federal reserve notes in practically limitless volume the suspension of payment and of loans that took place in 1897 and 1907, can never be repeated."

"I notice that new boarder always sneaks a few blinets."

"Is the poor fellow too poor to buy luncheon?"

"I think he's an amateur golfer."

The total income of the people of the United States is about \$25,000,000,000 a year. Of this \$10,000,000,000 is derived from agricultural products, \$2,500,000,000 from minerals and \$10,000,000,000 from manufactured articles.

ALL VIOLATION OF FEDERAL BIRD LAW WILL BE REPORTED

REGULATIONS HAVE NOT BEEN SUSPENDED PENDING DECISION OF COURT.

The following statement from the department of agriculture relative to the migratory bird law will be of interest to local sportsmen:

A misleading statement has recently become current in newspapers of the Mississippi valley and elsewhere, to the effect that the department of agriculture has suspended the enforcement of the federal regulations under the migratory bird law and by this means has enabled sportsmen, under state laws, to shoot wild fowl the coming spring.

Under the federal regulations as they now stand, the season on all migratory wild fowl is closed until next autumn throughout the United States. Federal inspectors and wardens are required, and others interested in the protection of wild fowl are requested to report to the department of agriculture all cases of violations of the regulations, in order that proper action may be taken.

The department of agriculture has no power to suspend the law or to pardon violations of the regulations. Doubtless the erroneous impression, on which the newspaper statements are based, has grown out of the pendency of litigation involving the constitutionality of the act of congress approved March 4, 1913, under which the regulations were promulgated. The lower federal courts disagreed as to the validity of the statute and the issue was carried to the supreme court in October, 1915, but has not been decided. Following the lower court decisions, congress appropriated money for the purpose of continuing the enforcement of the law. The department of agriculture is bound to report to the department of justice violations of the regulations. If the supreme court should declare the law constitutional, all persons should, therefore, be warned of the danger they incur from failure to abide by the regulations.

FOREST NOTES.

Ninety-three per cent of the lumber produced in 1914 in the northwest was represented by seven species—Douglas fir, western yellow pine, redwood, hemlock, cedar, white pine and larch, covering in amount 7,600,000,000 feet.

Of the total lumber cut in the five northwestern states for 1914, Douglas fir contributed four and three-quarter billion feet, or 58 per cent of the total.

The State of Washington produced in 1914 over three billion feet of Douglas fir, or approximately sixty-five per cent of the Douglas fir produced by the five northwest and coast states.

In the government figures on lumber cut in the northwest for 1914,

WHY DO YOU SUFFER PAINFUL TWINGES?

Backaches, Headaches, Lumbago and Rheumatic Pains Quickly Disappear Before New Remedy.

It is no longer necessary for any one to suffer with that headachy, all-run-down feeling that is often the result of kidney trouble.

It is no longer necessary for you to contend with disagreeable bladder and urinary disorders or to be tormented with rheumatism, stiff or swollen joints or the heart-wrenching miseries that follow as a result of neglected or poorly working kidneys.

Solvax is a wonderful discovery that has always been so uniformly successful that every package is sold under a positive guarantee to refund the money if it does not relieve the worst case of kidney disorders.

"Your money back if you want it," is the way Tallman & Co., the popular druggists are selling this great kidney remedy. A guarantee like that speaks eloquently for the merit of Solvax.

Do not suffer another minute. Solvax will relieve you, if it doesn't, tell Tallman & Co. that you want your money back and they will cheerfully refund it.

mills having an annual production of over 10 million board feet reported 85 per cent of the total lumber produced.

For the 1914 government figures on lumber cut, 498 mills reported from Oregon and 512 from Washington.

From California 175 mills reported, from Idaho 149, and from Montana 124 mills reported.

The importance of underground water to residents of humid sections is shown by the fact that 75 per cent of the population of Michigan are directly dependent for water on the underground supply.

How to Destroy Catarrh Germs and End Catarrh Forever

Catarrh is a germ disease and the only way to cure it so it will stay cured and never come back is to kill and drive out of your system the catarrhal germs which have found lodgment there. When the germs go the catarrh will stop. The trouble with most treatments, like sprays, salves, creams, greasy balms, lotions, etc., is that they give only temporary relief by opening up for a while the clogged head, throat and nostrils. In a little time the Catarrh comes back as bad as ever.

People who suffer continually from catarrh should drop such temporary makeshifts and get something that really gets at the root of the disease and stamps it out. There is nothing better for such cases than breathing into your nose and lungs the pleasant, soothing, healing, germ destroying 3% of Hyomei (pronounced Hye-ome) made from the purest oil of Eucalyptus and combined with other powerful healing, antiseptic and germ destroying ingredients. Hyomei penetrates and heals the inflamed, swollen membranes of your nose and throat, stops discharges, clears the passage and completely overcomes the disease by destroying its cause. For catarrh germs cannot live in your body after Hyomei reaches them. Tallman & Co. and many other good druggists in Pendleton and vicinity have long sold Hyomei on a positive guarantee of successful results or money back and find this generous policy pays. Most druggists are now giving a pocket inhaler made from hard rubber with every complete treatment sold. This makes a very simple, easy and convenient as well as a thoroughly reliable means of treating by the best known method this dangerous and often disgusting disease.
